

AIDS-related Kaposi sarcoma

Systemic therapy first line preferred regimen

20 mg/m² once every 2 to 3 weeks

PLD 20 mg/m² every 3 weeks

Versus

ABV

Results:

- Significantly increased overall response rate.
- Less toxicity.
- Similar finding in another trial of 241 patients

Cutaneous T-cell lymphomas (off-label use)

20 mg/m² days 1 and 15 every 4 weeks for 6 cycles (Dummer 2012)

20 mg/m² every 4 weeks (Wollina 2003)
